SUMMARY

Full Stack Developer with 2+ years of experience designing and delivering scalable web applications using React.js, JavaScript (ES6+), Node.js, Express.js, and MySQL. Skilled in building reusable component libraries, integrating RESTful APIs, managing state with Redux Toolkit, and boosting performance through lazy loading, code splitting, and memoization. Proven ability to deliver high-quality solutions in Agile/Scrum environments.

EDUCATION

Aditya Degree College, Visakhapatnam

Bachelor of Science (B.Sc.)

2019

EXPERIENCE

Developer

August 2024 – Present

Virinchi Limited

Hyderabad

- Developed scalable React.js applications using Hooks, Redux Toolkit, Context API, JavaScript (ES6+), HTML5, and CSS3.
- Built workflow-driven applications using React Flow and JointJS for configurable business process and borrower rule management.
- Integrated RESTful APIs using Axios and Fetch API for seamless frontend-backend communication.
- Developed backend services using Node.js, Express.js, and MySQL for workflow automation and business validations.
- Improved application performance using Code Splitting, Lazy Loading, Memoization, and reusable component architecture.
- Developed responsive, SEO-friendly, and Cross-Browser Compatible user interfaces following modern UI/UX standards.
- Collaborated with UI/UX Designers, Backend Developers, QA Engineers, and Business Analysts in Agile/Scrum environments.
- Participated in Git version control, Code Reviews, debugging, testing, and production deployments.

Assistant Excise Manager

September 2021 – December 2022

Lokesh Machines Limited

Hyderabad

- Managed statutory compliance, regulatory documentation, and audit reporting.
- Utilized SAP S/4HANA ERP to generate Delivery Challans, Tax Invoices, and commercial documents.
- Maintained business transactions in SAP S/4HANA and coordinated with Production, Warehouse, Finance, and Logistics teams to support dispatch and reporting activities.

PROJECTS

Money Tree – Custom Client Lending Platform | React.js | Node.js | Express.js | MySQL

- Developed reusable React.js components for configurable lending workflows.
- Integrated RESTful APIs for customer onboarding, loan application, approval, and management.
- Developed Node.js services for workflow automation and business validations.
- Optimized application performance using Lazy Loading, Memoization, and reusable architecture.

Underwriting – Borrower Rule Execution Platform | React.js | React Flow | JointJS | Node.js | YAML

- Built an interactive workflow builder using React Flow and JointJS.
- Developed reusable React.js components for dynamic YAML rule generation.
- Developed Node.js services for workflow execution and rule validation.

TECHNICAL SKILLS

Frontend: React.js, React Flow, JointJS, JavaScript (ES6+), HTML5, CSS3, Redux, Redux Toolkit, Context API, Material UI, Tailwind CSS, Formik

Backend: Node.js, Express.js, RESTful APIs, MySQL, MongoDB

Tools: Axios, Git, GitHub, Postman, Chrome DevTools, SAP S/4HANA ERP

Practices: Agile, Scrum, Performance Optimization, Responsive Design, Code Splitting, Lazy Loading, Memoization, Cross-Browser Compatibility
